Re: SWN Production Company, LLC - Roy Riggle Pad- 069-00121 - R13-2950E

SWN has applied for a Class I Administrative Update to current permit R13-2950D to remove two compressors and a line heater, and two reduce condensate and produced water production. Since the emissions will reduce due to the change, it is the writers opinion that SWN be granted this Class I Administrative Update.
